About ISPGR

The Indian Society of Plant Genetic Resources (ISPGR) was founded in 1987 as a multi-disciplinary scientific body involved in the various issues of plant genetic resources (PGR) and related fields. It currently has more than 600 members, nearly 500 of them being life members. The genesis of the society was from the initiative taken by the scientists at the National Bureau of Plant Genetic Resources (NBPRG), New Delhi, under the leadership of Dr R.S. Paroda, the then Director of NBPRG. The Society was formally registered under the Societies Registration Act, 1860 on November 3, 1987. Membership is open to all persons interested in the field of PGR in India and abroad.

Objectives

- To promote research in the field of PGR especially in germplasm exploration and collection, conservation, evaluation and characterisation, introduction and exchange, quarantine and related activities.
- To encourage the management of PGR in an integrated fashion involving different disciplines such as Economic Botany, Ecology, Ethnobotany, Biosystematics, Biotechnology, Physiology, Horticulture, Seed Science, Agronomy, Pathology, Entomology, Nematology, Chemistry, Biochemistry and Computer Science.
- To provide a forum to the scientists for expressing their critical views based on scientific knowledge, rational thinking on policies related to PGR. To provide recognition to persons having made significant contribution in furthering the science of plant genetic resources.
- To work in association with international organizations and other societies with similar interests.
- To publish research journal at periodical intervals.
